

We're in the process of developing a new service, Online Market, an e-commerce platform that facilitates selling and buying products. Sellers, once approved by the admin, can list their products for sale, cancel orders, and receive email notifications for placed orders. On the other hand, customers (buyers) can add, edit, or remove items from their shopping cart, view order history, and download order receipts. Payment processing is handled by a third party, and buyers can also author product reviews. Admin has the authority to approve seller registrations and product reviews submitted by customers.

Seller: Seller can add products once he/she is approved by Admin (as a registered Seller). Seller cannot buy products from this website. Seller can cancel an order placed by a buyer. Seller can delete a product but if there is an order with that product, the product cannot be deleted. Seller gets email notifications of placed orders. **Customer (aka Buyer):** Customer cannot sell items on this website. Customer can add/edit/delete products to the shopping cart. Buyer can have a log of his/her past orders. Order payment is handled by a third party. Buyer can cancel an order before it gets shipped. Buyer can download a pdf receipt of the order. Buyer can write a product review. Buyer will get email notification of their purchased product.
